

Thrust Screws - Headless -Torx drive

ball ended - flat - metal

Thrust Screws

34048

THRUST SCREWS

Material

Steel type-

Body: heat treated steel, 1200 +/-100 N/mm².

Ball: ball bearing steel hardened.

Stainless steel type-

Body: stainless steel 1.4305 (AISI 303).

Ball: stainless steel, hardened.

Technical Notes

For clamping, tightening or supporting of surfaces that are not exactly parallel.

*** stated load capacity relate to steel version only.**

Torx drive for improved installation.

Tips

Ball not secured against rotation. For other types see following pages.

Clamping, supporting and aligning non-parallel and uneven surfaces is greatly simplified with the use of Wixroyd self-aligning pads and thrust screws. Available with ridged faces for improved holding of cast components, or plastic faces for holding more delicate parts.

Self-aligning Thrust Screws

34000 to 34060 - Self-aligning thrust screws in sizes M6 to M24, ideal for clamping or supporting non-parallel surfaces.

Self-aligning Pads

34080 to 34121 - Self-aligning pads, both male and female mounting, ideal for accommodating variations between parts in fixtures.

Thrust Screws

34140 to 34160 - Thrust screws, with either brass or thermoplastic pads, are suitable for gentle clamping and positioning more delicate parts.
