

Grippers - Self Aligning diamond coated - female threaded housing

Grippers & Rest Pads

35642

GRIPPERS & REST PADS

Material

Housing: alloy steel, heat treated to HRC 43-46 with black oxide finish.
Pad: diamond powder bonded to AISI 300 series stainless steel ball.

creates an abrasive surface comparable to 100 grit abrasive value. Ideal for holding smooth or slippery components with a minimum of clamping pressure, and minimal surface marking. Excellent wear resistance.

Tips

Re-seating: expel air by using 0,3 monofilament line between ball and housing, remove line when seated correctly.

Technical Notes

Permanently fused diamond powder

Grippers enhance workholding for multiple machining operations.

Grippers increase handling capability.

Pads and Gripper Options

Pads

Solid Carbide
High impact carbide pads, can be brazed or bonded into place.

Carbide Tipped
Constructed with high impact carbide pad brazed to a heat treated alloy steel body. Mount via tapped hole or a flat on the outside diameter for set screw mounting.

Hardened Steel
Made from 8620 steel, carburized and hardened to Rc 58/60 1.2mm with black oxide finish. Mount via tapped or counter bored hole.

Non-marking Thermoplast
Made from white thermoplast. Mount via tapped or counter bored hole.

Stainless Steel
Pad from 17-4 stainless steel, hardened to Rc 43/46. Mount via tapped or counter bored hole.

Abrasive Diamond Surface
Abrasive surface permanently fused to a 17-4 stainless steel pad, hardened to Rc 43/46. The surface texture is comparable to a 100 grit abrasive. Mount via tapped or counter bored hole.

Soft Urethane Surface
Urethane surface is permanently bonded to a 300 series stainless steel pad. The urethane provides excellent protection against damage on delicate work surfaces. Tapped hole mounting.

Grippers

High Speed Tool Steel
Manufactured from M-2 high speed tool steel, hardened to Rc 60/62 with black oxide finish. Mount via tapped hole, counter bored hole or a flat on the outside diameter for set screw mounting.

Carbide Tipped
Constructed with high impact carbide pad brazed to a heat treated alloy steel body. Mounts via tapped hole or a flat on the outside diameter for set screw mounting.

Solid Carbide
Manufactured from high impact carbide in a solid gripper pad or as a solid gripper body with a threaded brazed-in steel insert. Mount via tapped hole or a flat on the outside diameter for set screw mounting.

A Range of Specialist Gripping Pads to Suit Your Application

Unique urethane coat prevents marking of delicate components during machining or manipulation by robots. The urethane pad is permanently bonded to the stainless steel body of the gripping pad. With a bubbled texture, air is able to escape and hence avoid any suction action - enabling easy releasing of parts.

Urethane Coated

These are available in three different urethane durometers.

35 durometer:
Pencil rubber top

60 durometer:
Car tyre

80 durometer:
Skateboard wheel

To improve handling of smooth or slippery components, with a minimum of clamping pressure, our abrasive diamond coated pads provide an excellent solution.

Abrasive Diamond Coated

Diamond powders are permanently fused to a 17-4 stainless pad, to provide an abrasive surface comparable to 100 grit value.

Sandpaper of 100 grit texture

Pads of 17-4 Stainless, hardened to RC 43/46 provide solutions to applications where material selection is of greater importance; for example nuclear or food processing or pharmaceutical applications.

Stainless Pads
