male: male

Anti-Vibration

**61040**

ANTI-VIBRATION

## Material

Rubber on silver zinc plated steel (rubber hardness - 55 Shore A).

Different thread sizes on request.

For rubber mounted on stainless steel - see part no. 61042.

and radial as shown).

Typically used in machinery, compressors, air conditioning units, light engineering equipment etc.

## Technical Notes

Parts with small diameters ( $d_1$ ) and relatively long length (h) cannot accept radial loads (as shown in table).

## Tips

These cylinders are used to reduce vibration by allowing some movement (in axial

Anti-Vibration

**61042**

ANTI-VIBRATION

## Material

Rubber on stainless steel, A2 (rubber hardness - 55 Shore A).

## Technical Notes

For rubber mounted on silver zinc plated

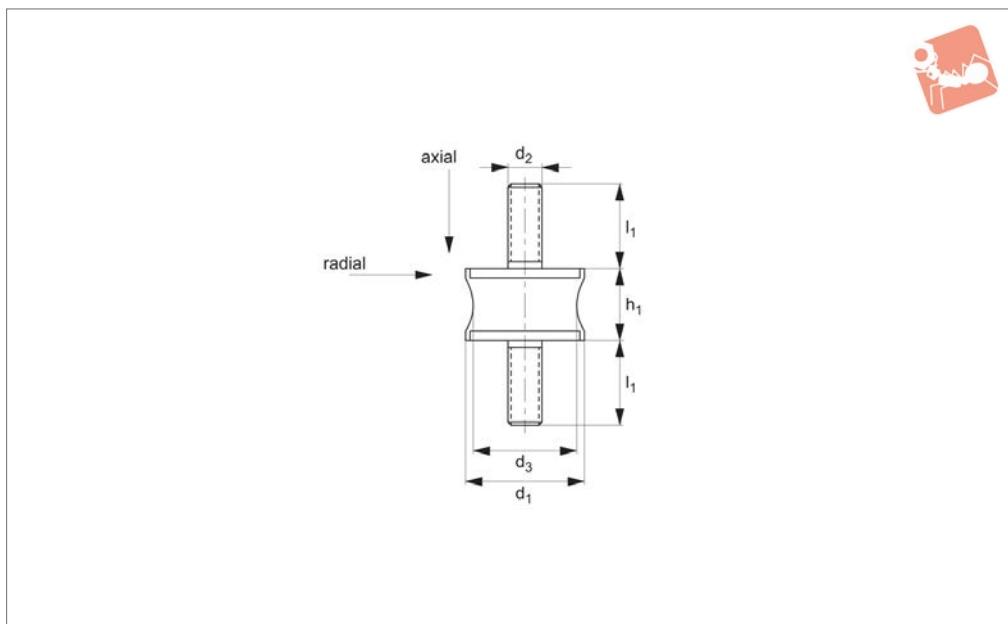

steel - see part no. 61040.

## Tips

These cylinders are used to reduce vibration by allowing some movement (in axial and radial as shown).

Typically used in machinery, compressors, air conditioning units, light engineering equipment etc.

61115.W0300	30	30	M8	30	20	11	3.50

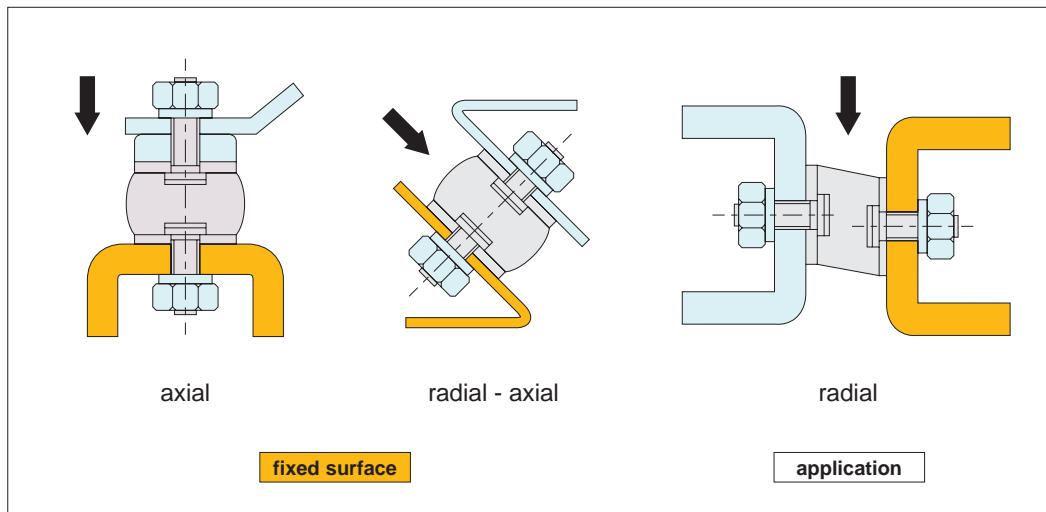

# General Anti-vibration Cylinders

## installation methods for cylinders

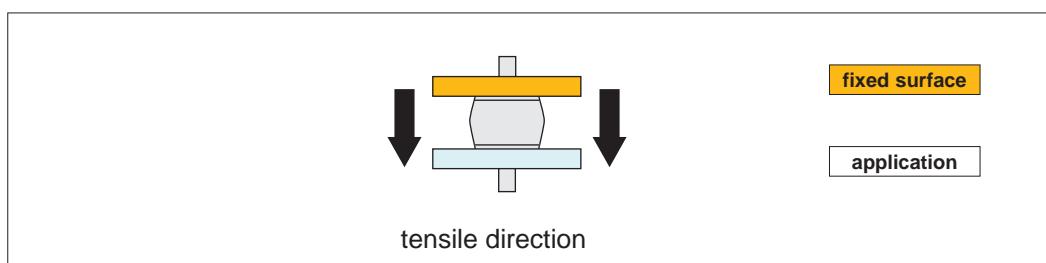

### Acceptable loads

Cylindrical mounts are never to be used in tension, they should only be used in axial or radial. Radial loads are however considerably less than axial loads. Parts with small diameters ( $d_1$ ) and relatively long lengths ( $h$ ) cannot accept radial loads.

### Installation

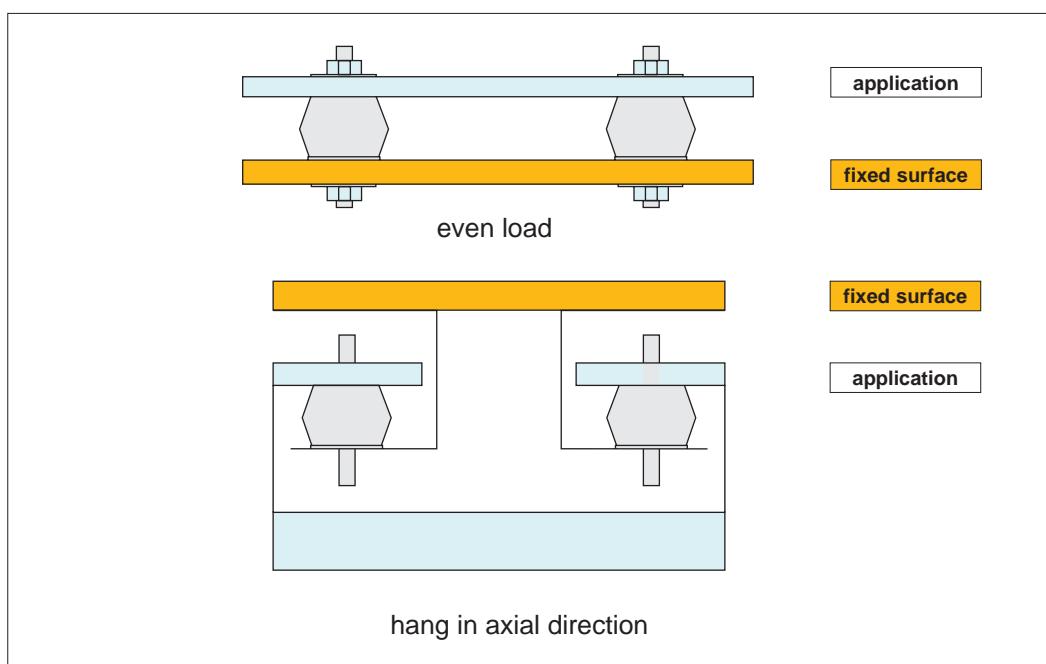

#### Incorrect installation

#### Correct installation

The height of the insulator may vary as the rubber is compressed under load.

Do not remove the rubber burr around the edge of the metal, this could cause detachment of rubber from the metal studs.

Anti-Vibration

**61110**

ANTI-VIBRATION

## Material

Rubber on silver zinc plated steel (rubber hardness - 55 Shore A).

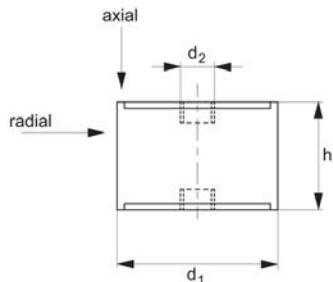

## Tips

These cylinders are used to reduce vibra-

tion by allowing some movement (in axial and radial as shown).

Typically used in machinery, compressors, air conditioning units, light engineering equipment etc.

Order No.	d <sub>1</sub>	h <sub>1</sub>	d <sub>2</sub>	l <sub>1</sub>	d <sub>3</sub>	Compression max.	Axial load kgf max.	Radial load kgf max.

**61206****Material**

Rubber on silver zinc plated steel (rubber hardness - 55 Shore A).

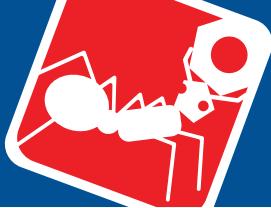

**Tips**

These cylinders are used to reduce vibra-

tion by allowing some movement (in axial and radial as shown in drawing).

Typically used in machinery, compressors, air conditioning units, light engineering equipment etc.

# Anti-vibration Bumpers

male

Anti-Vibration

**61210**

ANTI-VIBRATION

## Material

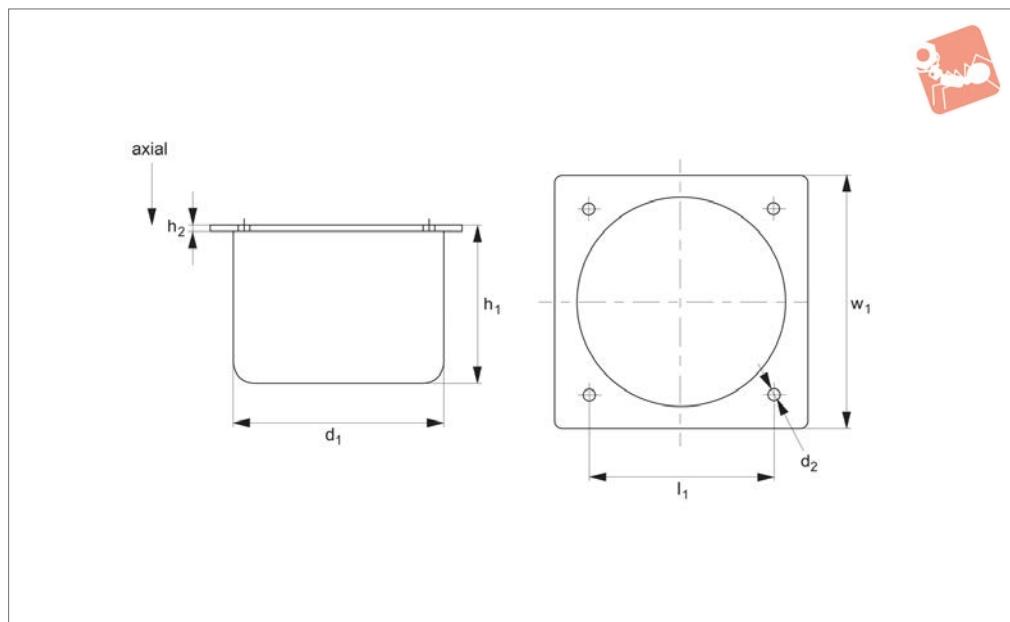

Rubber on silver zinc plated steel (rubber hardness - 55 Shore A).

## Tips

These anti-vibration bumpers are used to reduce vibration and shock. Their cylindrical shape ensures that when used in a

row, the buffers spread the loads over a number of buffers - reducing the chances of possible overloading.

Order No.	d <sub>1</sub>	h <sub>1</sub>	d <sub>2</sub>	l <sub>1</sub>	Compression max.	Axial load kgf max.

# Anti-vibration Mounts

Anti-Vibration

**61280**

## Material

Rubber on silver zinc plated steel (rubber hardness - 60 Shore A).

## Technical Notes

Provides an elastic support mechanism for equipment isolation. Used in generator sets, motors, pumps and most other

machine parts.

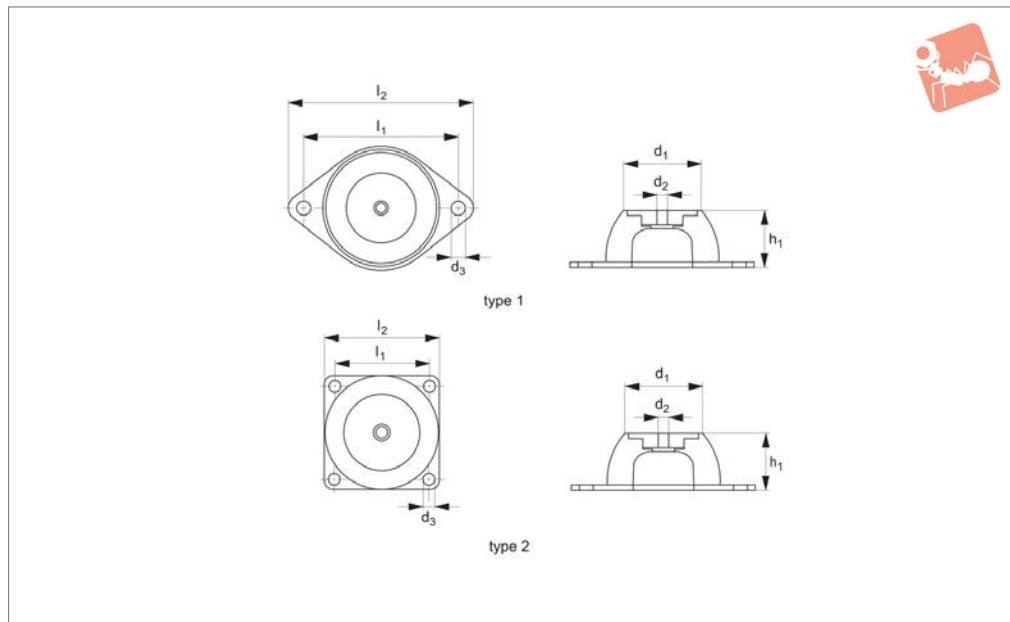

Please note for marine applications or very demanding use we recommend the mounts with 'fail-safe' features part numbers P2100, 61292 and 61294.

## Tips

These are a very popular anti-vibration

mount for light to heavy duty applications. Take the total weight of the load to be supported, divide it by the number of mounts to be used and select an appropriate mount from the above table. Type 2 is 'fail-safe'.

Order No.	Type	d <sub>1</sub>	d <sub>2</sub>	d <sub>3</sub>	h <sub>1</sub>	l <sub>1</sub>	l <sub>2</sub>	Axial load kgf max.	Shore

# General Anti-vibration Machine Mounts

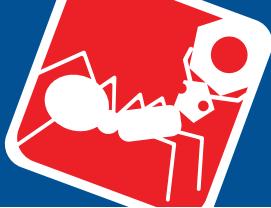

Installation methods for machine mounts

## Recommendations for machine mounts

Machine mounts should be installed between two parallel and perfectly flat surfaces. Mounts operating tilted or twisted do not work properly. This may be due to incorrect alignment, tolerances in the building of the structure or over-tightened torque during the installation of the anti-vibration mounts.

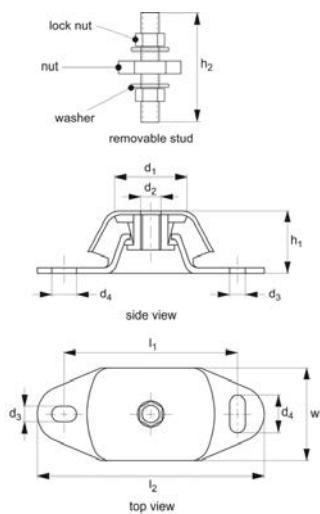

# Anti-vibration Fail-Safe Mounts steel

Steel

Anti-Vibration

**61290**

ANTI-VIBRATION

## Material

Rubber on silver zinc plated steel (rubber hardness - 45-75 Shore A).

## Technical Notes

These mounts control vibration in three axes.

Primarily used for marine applications, engines, compressors, pumps, generators

etc.

Fitted with a mechanical fail-safe stop. They are very robust to cope with high start/stop forces and vibrations from marine and other engines.

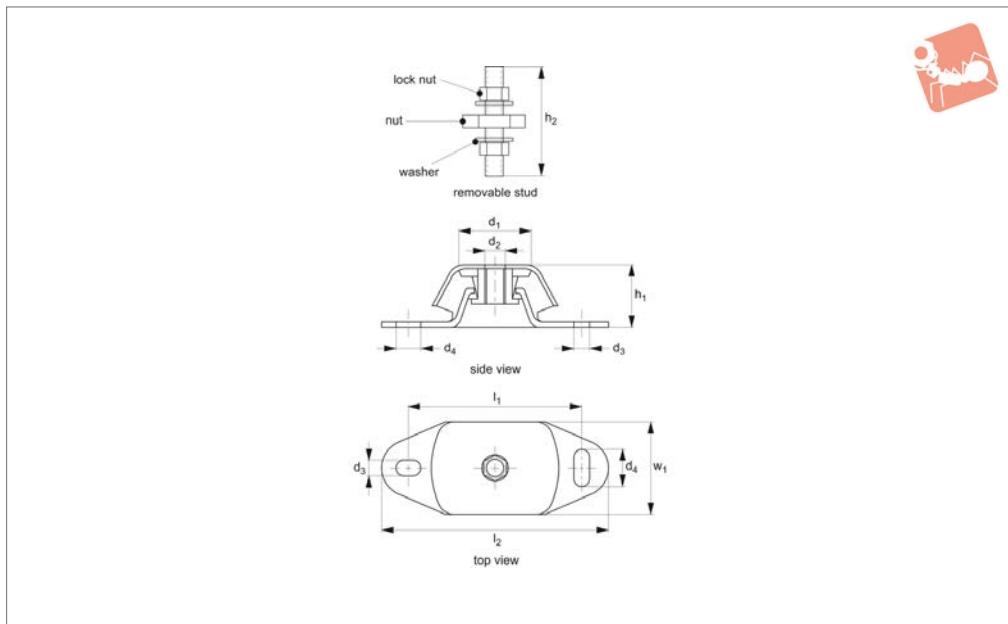

For stainless steel versions please see part nos. 61292 and 61294. Stud and nuts on

request.

## Tips

These are a very popular anti-vibration mount for light to heavy duty applications. Take the total weight of the load to be supported, divide it by the number of mounts to be used and select an appropriate mount from the table.

**61480****Material**

Rubber on silver zinc plated steel (rubber hardness - 55 Shore A).

**Technical Notes**

Type 1: M12 thread supplied as separate

item to be screwed in if required.

Type 2: A twin version of type 1 and so therefore take heavier loads.

The central hole in the rubber pad increases the flexibility of the unit - improving

anti-vibration properties.

Used where good deflection properties are needed and for isolating of frequencies higher than 10Hz.

## Anti-vibration Bushes hemisphere

Anti-Vibration

**61820**

ANTI-VIBRATION

### Material

Sorbothane.

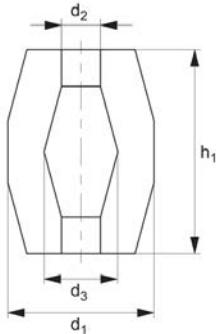

### Technical Notes

Sorbothane hemisphere mounts provide a

quick, cost effective method of isolating bench equipment and small machinery.

Simply place the hemisphere under the unit to be isolated with the curved surface

up. Expect a 25-30% deflection when statically loaded.

**61830****Material**

Rubber (hardness - 55 Shore A).

**Technical Notes**

Used in a wide range of vibrating

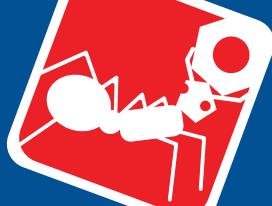

machines.

Allows high deformation with excellent spring back characteristics.

Supports axial and radial loads but not

designed for traction or tension loads. For radial loads please contact our Technical Department.

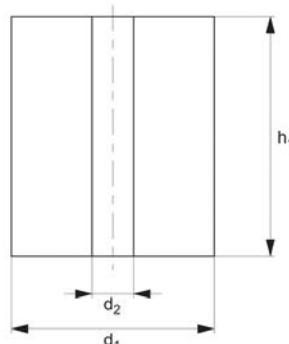

Order No.	$d_1$	$h_1$	$d_2$	$d_3$	Compression max.	Axial load kgf max.

**61855****Material**

Rubber on silver zinc plated steel

**Technical Notes**

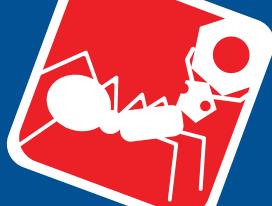

This anti-vibration mount is ideal for applications of major dynamic loads where

movement control is necessary, such as in the cabin of all types of mobile vehicles. It also offers optimal stability, as well as good attenuation of impacts and vibrations.

**Important Notes**

The double washer mounts are made of two parts of rubber, one of which bears an inside metal bushing which acts as a guide through the machine anchoring screw.

# Acoustic Ceiling Hangers

with spring and pad

Anti-Vibration

**61930**

ANTI-VIBRATION

## Material

Zinc plated steel (anti-corrosive treatment) with Sylomer® pad and steel spring.

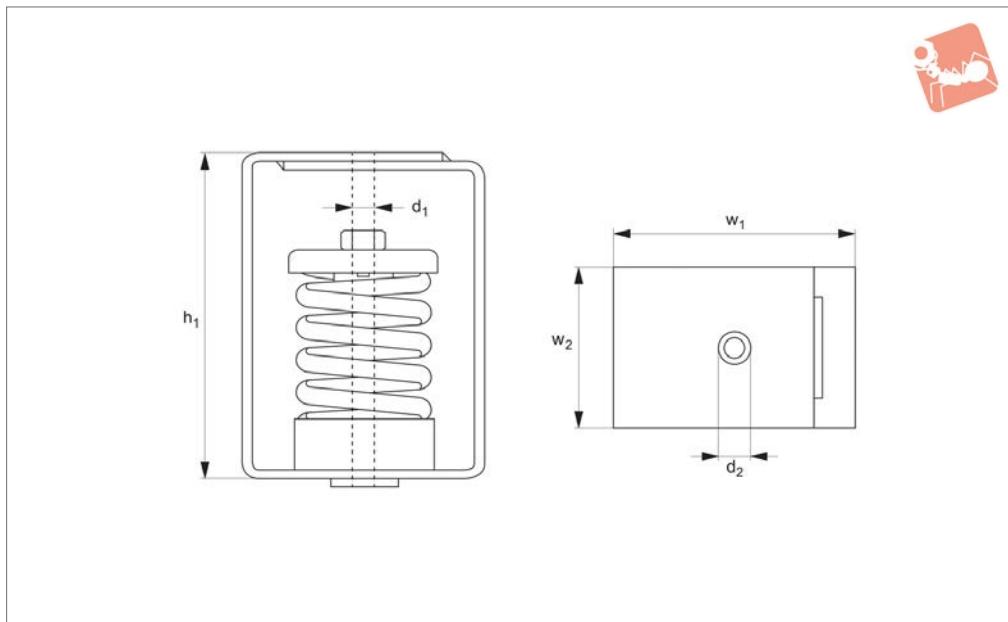

## Technical Notes

These hangers come in six different steel

spring strengths for increasing loads.

The metal housing has an anti-corrosive treatment, which can withstand very harsh conditions and also resist high tensile stresses up to 1000kg.

ANTI-VIBRATION

## Material

Steel anti-corrosive zinc plated, with rubber (50 shore A) cylinder.

## Technical Notes

These units are designed for installations

where objects are suspended from ceilings.

The spring in the body provides good anti-vibration properties.

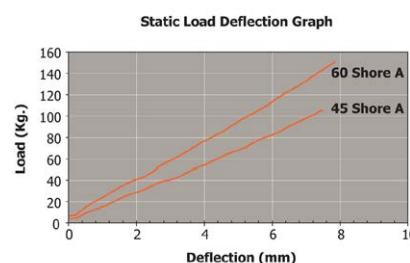

The metal hanger is designed to cope with loads up to 1000kg.

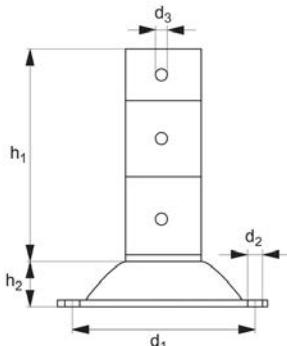

## Tips

Select the damper corresponding to the load to be carried per unit.

These hanger can be used for fans, distribution pipes, ducts and acoustic ceilings.

Order No.	d <sub>1</sub>	w <sub>1</sub>	h <sub>1</sub>	d <sub>2</sub>	d <sub>3</sub>	d <sub>4</sub>	h <sub>2</sub>	h <sub>3</sub>	h <sub>4</sub>	l <sub>1</sub>	Load range kgf
